SUMMARY

Senior Frontend Engineer with 6+ years of full-stack JavaScript/TypeScript experience. Specializes in scalable web architecture with React, Vue.js, Svelte, Node.js, and PostgreSQL.

Shipped production features at one of Indonesia's largest digital wallets and for US and global clients. Experience spans design-system libraries, CMS platforms, and AI/LLM-powered SaaS.

EXPERIENCE

Unfold Solution - Full Stack Engineer

Feb 2026 – Present · Melbourne, VIC (remote) · Software product company

- Designed a **reusable React component library** from a Figma-based design system, standardizing UI across web apps. Stack: React, TypeScript.
- Applied a configurable, **reusable data-table component** adopted across multiple business domains, cutting duplicate UI code ~50% and speeding up feature delivery. Stack: React, TypeScript.
- Replaced Firebase Dynamic Links with an **in-house deep-linking service**, cutting operational cost. Stack: React, Node.js.
- Shipped the **customer ordering flow and merchant portal** (product & order management) for **Halal Finder**, a meat-shop delivery platform. Stack: React, Node.js, TypeScript.

LinkAja - Senior Web Development Associate

Jan 2021 – Nov 2025 (4 yrs 11 mos) · Jakarta / Yogyakarta, Indonesia

LinkAja: one of Indonesia's largest digital wallets, serving 8M+ users, founded by a consortium of state-owned enterprises including Telkomsel.

Merchant Experience Team (May 2023 – Nov 2025)

- Architected LinkAja's internal **React component UI-Kit library**, turning Figma designs into reusable components that standardized UI and accelerated feature rollout across LinkAja web products. Stack: TypeScript, TurboRepo, Storybook, Vite, Jest.
- Shipped the **Merchant Web Portal and onboarding flow**, streamlining how merchants register and manage their accounts. Stack: React, TypeScript, Styled-Components.
- Launched customer-facing **mobile web-view features**, a JSON-driven dynamic content renderer and a partner loyalty point-exchange flow, live in the LinkAja app. Stack: TypeScript, Next.js, React, Zustand.
- Maintained **multiple CMS platforms (B2C and B2B)** powering LinkAja's in-app menu, ads, and partner operations. Stack: React/Next.js, Formik, React-Redux.

Loyalty & Promo Team (Jan 2021 – May 2023)

- Implemented post-promo management tooling and the voucher-rules engine for the **Promo & Loyalty CMS**, powering 20+ nationwide promotional campaigns. Stack: Vue.js, Vuex, Vuetify, Jest.

Upwork - Freelance Full-Stack Developer

Nov 2017 – Dec 2021 (concurrent freelance) · Remote (global clients)

Independent client engagements completed via Upwork, the global freelancing marketplace, alongside full-time roles.

- **ShopperArmy (shopperarmy.com)**: Integrated a third-party survey provider (Morning Consult) into the consumer-research platform, automating end-to-end ingestion of 100+ surveys. Stack: Nuxt, Pinia, Supabase, TailwindCSS, Loop.
- **MergeStat (www.mergestat.com)**: Created a web SaaS (500+ GitHub stars) letting users query their Git contribution history with SQL. Stack: React, Next.js, TailwindCSS, Figma-to-React UI Kit.
- **The Wedding Quill (yourweddingquill.com)**: Built an AI SaaS that generates wedding speeches from user-supplied media references, owning the React front-end through to delivery. Stack: React, Node.js, NestJS, MongoDB, AWS.
- **Also**: an AI/ML RAG SaaS (DocumentBase: NestJS, Python, Pinecone, LangChain) and a GameFi dApp built from scratch (Monopolon: React, Next.js, Web3.js, BNB Chain).

Keller Williams Realty, Inc. - Frontend Engineer

Jul 2019 – Feb 2021 (1 yr 8 mos) · Austin, Texas, USA (remote)

Keller Williams: the world's largest real estate franchise by agent count (US-based).

- Built a web platform for real-estate agents at **the world's largest franchise by agent count (~190,000 agents)**, including a reusable Figma-to-React component system and Sentry/LogRocket monitoring. Stack: Next.js, React, Redux, microservices.

Sorabel by Sale Stock - Frontend Engineer

Dec 2019 – Dec 2020 (12 mos) · Yogyakarta, Indonesia

Sorabel (formerly Sale Stock): VC-backed Indonesian fashion e-commerce startup.

- Engineered a full **Warehouse Management System (WMS)** spanning inbound, outbound, inventory transfers, and long-haul logistics. Stack: React, Flow, Express, Node.js, Backend-for-Frontend (BFF), GraphQL, Auth0.

Sebangsa Network - Frontend Engineer

Aug 2018 – Nov 2019 (1 yr 4 mos) · Yogyakarta, Indonesia

Sebangsa: Indonesian social-network / civic-tech startup (Arena.id).

- Built the **Arena.id social-media platform** with isomorphic (server-side) rendering. Stack: React, React-Redux, Express, and a server-client API layer.

TECHNICAL SKILLS

- **Languages**: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL
- **Front-End**: React, Next.js, Vue.js (Vuex/Vuetify), Nuxt, Pinia, Svelte/SvelteKit, Redux, Zustand, Formik, Styled-Components, Sass, TailwindCSS, Storybook, TurboRepo, Vite
- **Back-End**: Node.js, NestJS, Express, GraphQL, REST/OpenAPI, TypeORM, Backend-for-Frontend (BFF), microservices
- **Databases / BaaS**: PostgreSQL, MySQL, MongoDB, Supabase
- **AI / LLM**: LangChain, Pinecone (vector DB), RAG, OpenAI APIs
- **AI-Augmented Dev**: Claude & Claude Code (AI pair programming, LLM-assisted coding & code review)
- **Cloud / DevOps**: AWS (ECS), CI/CD (GitHub Actions, Jenkins), Terraform, Auth0
- **Web3**: Web3.js, smart contracts
- **Testing**: Jest, React-Testing-Library, unit testing

- **Performance & Accessibility:** Lighthouse, Core Web Vitals, WCAG / a11y
 - **Practices:** Agile, design-system architecture, Figma-to-code, Sentry & LogRocket monitoring
-
